Product Requirements Document (PRD): Honey Group Promotions Platform

1. Executive Summary & Project Overview

Honey Group Promotions manages a national network of 280+ brand promoters across South Africa. The objective is to transition from manual spreadsheet coordination to a mobile-first digital platform that automates onboarding, job dispatch, geo-verified attendance, and payroll.

The Vision: A scalable, Uber-like "gig economy" infrastructure capable of supporting 5,000+ promoters nationally.

2. Goals & Success Metrics

- **Efficiency:** Reduce manual payroll processing time by **80%**.
- **Scalability:** Support a growth trajectory from 280 to **5,000+ promoters**.
- **Reliability:** Maintain **99.9% uptime** during peak check-in windows (Friday/Saturday nights).
- **User Experience:** Onboard a new promoter in **< 5 minutes**.

3. User Personas & Permissions Matrix

Feature Area	**Promoter**	**Supervisor**	**Admin / Agency**	**Client (Future)**
Onboarding	Register & Upload Docs	N/A	Review & Approve	No Access
Job Management	View & Accept Jobs	View Assigned Team	CRUD Jobs & Logic	View Reports
Shift Management	Geo-Check In/Out	Monitor Live Attendance	View Live Map	View Attendance
Payments	View Earnings	No Access	Approve & Export	No Access

Feature Area	Promoter	Supervisor	Admin / Agency	Client (Future)
User Management	Edit Own Profile	View Team Profiles	Full CRUD Users	No Access

---

4. Detailed Functional Requirements (User Stories)

Epic 1: Promoter Onboarding & Vetting

Goal: To digitize the vetting process and ensure compliance with South African labor/tax laws.

- **Story 1.1: Verification:** As a Promoter, I want to verify my mobile number via **OTP** and email so my account is secure.
  - *AC:* 6-digit OTP via SMS (Africa's Talking/Clickatell); expires in 5 mins.
- **Story 1.2: Profile Creation:** As a Promoter, I must input my Full Name, ID Number, DOB, Gender, Physical Attributes (height, clothing size), and Address.
- **Story 1.3: Document Vault:** As a Promoter, I must upload a South African ID (Front/Back), Tax Number, Bank Confirmation Letter, CV, and 3 Profile Photos.
  - *AC:* Accept PDF/JPG/PNG (Max 5MB). Photo must use camera or gallery.
- **Story 1.4: Admin Review:** As an Admin, I want to approve/reject applicants based on their uploaded docs to maintain quality.

Epic 2: Job Creation & Smart Allocation

Goal: To automate the matching of promoters to brand activations.

- **Story 2.1: Campaign Setup:** As an Admin, I want to create a job with a Title, Client, Venue (Google Maps API), Date/Time, Hourly Rate, and **Attribute Filters** (e.g., "Female, Height > 1.6m").
- **Story 2.2: Push Notifications:** As a Promoter, I want to receive a notification for jobs within a **20km radius** of my GPS location.
- **Story 2.3: Smart Logic:** The system must automatically suggest/allocate promoters based on:
  - Distance from venue.
  - Reliability Score (previous performance).
  - Matching physical attributes.

Epic 3: Shift Execution (The Critical Path)

Goal: To ensure promoters are physically present and on time.

- **Story 3.1: Geo-Verified Check-In:** As a Promoter, I can only "Start Shift" if I am within **200 meters** of the venue.

    - *AC:* Requires GPS verification + Mandatory Selfie. Timestamp recorded immediately.
- **Story 3.2: Supervisor Live View:** As a Supervisor, I want to see a real-time list of "Checked In," "Late," and "No-Show" promoters.
- **Story 3.3: Issue Logging:** As a Supervisor, I want to flag "Uniform Problems" or "Behavior Concerns" directly on a promoter's active shift.

5. Technical Specifications & Stack

- **Mobile App:** Flutter (iOS 13+, Android API 24+).
- **Web Dashboard:** React.js or Node.js/Express.
- **Database:** PostgreSQL (Relational) + Redis (for live location tracking).
- **Infrastructure:** AWS (EC2, RDS, S3 for document storage).
- **Integrations:**
    - **Maps:** Google Maps SDK & Places API.
    - **Payments:** Paystack / PayFast (Bulk South African EFT).
    - **Compliance:** POPIA-compliant data handling.

6. Payroll & Reporting

- **Auto-Calculation:** Payments = (Approved Hours × Rate) - (Late Arrival Deductions).
- **Promoter Wallet:** Real-time view of "Total Earnings," "Pending," and "Paid."
- **Exports:** Admin can export payroll data via **CSV/Excel** for accounting.
- **Client Reports:** Automated PDF reports showing campaign attendance and feedback.

User Flow Diagram

This User Flow diagram outlines the three primary journeys within the Honey Group platform: **Promoter Onboarding**, **Job Matching/Allocation**, and **Shift Execution**.

1. Promoter Onboarding & Vetting Flow

Goal: Move a lead from "Registered" to "Verified Partner."

1. **Start:** Download App → **Registration Screen**.
2. **Auth:** Enter Mobile Number → **OTP Received (SMS)** → Enter OTP.
3. **Data Entry:** Complete Basic Profile (Name, ID, Physical Attributes).
4. **Compliance:** Upload ID (Front/Back) + Bank Confirmation + Tax No + Photos.
5. **Submission:** Status changes to `Pending Review`.
6. **Admin Portal:** Admin reviews documents.

- *If Rejected:* Admin enters reason → Push Notification sent to Promoter → Return to Step 4.
- *If Approved:* Account Status = `Active` → Unlocks **Job Feed**.

2. Job Allocation & Notification Flow

Goal: Match the right person to the right brand activation.

1. **Admin Action:** Create Job (Venue, Date, Rate, Gender/Height Requirements).
2. **System Logic:** Filter Active Promoters within **20km radius** who meet physical requirements.
3. **Notification:** Push Notification sent to matched Promoters: *"New Job at [Venue] - R [Rate]/hr"*.
4. **Promoter Action:** View Job Details → **Accept** or **Decline**.
5. **Confirmation:**

- First 5 (or required number) to accept are **Allocated**.
- Remaining acceptors are moved to **Standby List**.

6. **Status Change:** Job moves to "My Shifts" tab for the Promoter.

3. Shift Execution & Payroll Flow (The Critical Path)

Goal: Geo-verify attendance and automate the pay cycle.

1. **Pre-Shift:** Promoter arrives at Venue.
2. **GPS Check:** Promoter clicks **"Start Shift"**.

- *System Check:* Is Promoter < 200m from Venue GPS?
- *If NO:* Show error: "Move closer to venue to check-in."
- *If YES:* Proceed to **Selfie Verification**.

3. **Active Shift:** Timestamp recorded. Supervisor Dashboard updates to `Checked In`.
4. **Monitoring:** Supervisor logs any "Issues" (Late, Uniform, Performance) during the shift.
5. **Shift End:** Promoter clicks **"End Shift"** → Final Selfie + GPS Check.
6. **Post-Shift Calculation:**

- Total Hours = `End Time` - `Start Time`.
- Gross Pay = (Hours × Rate) - (Deductions for Lateness/Issues).

7. **Payroll:** Admin reviews "Calculated Pay" → **Bulk Approve** → Export to **Paystack** for EFT.

4. Supervisor Intervention Flow (Edge Cases)

- **No-Show:** If `Start Time` + 15 mins passes without Check-In → Alert Supervisor.
- **Replacement:** Supervisor clicks **"Request Standby"** → System notifies the next person on the Standby List from the Allocation Flow.
- **Performance:** Supervisor submits **Rating (1-5 Stars)** → Updates Promoter's "Reliability Score" for future job matching.

Summary of State Changes

Object	Initial State	Trigger	Final State
Promoter	Guest	OTP + Doc Upload	Active / Blacklisted
Job	Draft	Admin Publish	Filled / Completed
Shift	Scheduled	GPS Check-in	Pending Approval / Paid

Wireframe Framework

1. Promoter Mobile App (Flutter)

Core Goal: Speed and clarity. Promoters need to get in, see work, and check in.

A. Onboarding & Profile (The Gateway)

- **Screen 1: Welcome/Login:** Simple "Enter Mobile Number" field with a "Send OTP" button.
- **Screen 2: OTP Verification:** 6-digit input boxes with a "Resend" timer.
- **Screen 3: Document Vault:** A checklist style UI.
  - *ID Upload:* Clickable cards for "Front" and "Back."
  - *Bank Letter:* Upload button + "Must be < 3 months old" tooltip.
  - *Profile Photos:* 3 slots with an "Open Camera" shortcut.
- **Screen 4: Profile Details:** Form fields for Height, Clothing Size, and Social Media handles.

B. Job Discovery & Execution (The "Money" Screens)

- **Screen 5: Job Feed (Available Jobs):** Map view at the top (showing pins within 20km) and cards below.
  - *Cards:* Brand Logo, Venue, Date, Hourly Rate, and a "View Details" button.
- **Screen 6: Shift Dashboard (Active Job):** Large "Current Shift" card.
  - *The "Big Button":* A "Slide to Start Shift" slider (grayed out until within 200m of the GPS pin).

    - *Selfie Verification:* A circular camera preview for the mandatory check-in selfie.
- **Screen 7: Earnings Tab:** Simple bar chart showing "Paid" vs. "Pending" amounts and a list of completed shifts.

2. Supervisor Mobile App (Flutter/Web View)

Core Goal: Monitoring and intervention.

A. Live Campaign View

- **Screen 1: Active Campaigns:** A list of venues currently running activations.
- **Screen 2: Attendance Monitor:** A traffic-light system list:
    - □ **Green:** Checked In (Time + Selfie thumbnail).
    - □ **Yellow:** Late (5+ mins past start).
    - ● **Red:** No-Show (15+ mins past start).
- **Screen 3: Issue Logger:** A quick-action menu for a specific promoter.
    - *Buttons:* "Wrong Uniform," "Behavior Issue," "Mark as No-Show."
    - *Text Box:* "Add Note for Admin."

3. Admin Web Dashboard (PostgreSQL/React)

Core Goal: Control, approval, and payroll.

A. Management Modules

- **Module 1: Applicant Review (Table View):** * Rows of "Pending" promoters.
    - *Split-Screen Detail:* Left side shows the ID/Bank letter; right side shows "Approve" or "Reject with Reason" (e.g., "Blurry ID").
- **Module 2: Job Creator (Wizard):**
    - *Step 1:* General Info (Client, Brand, Dates).
    - *Step 2:* Location (Google Maps Pin picker).
    - *Step 3:* Smart Filters (Checkboxes for Gender, Height, Black Shoes required).
    - *Step 4:* Cost Calculator (Shows: Total Promoters x Hours x Rate = Estimated Budget).
- **Module 3: Live Operations Map:** A full-screen Google Map showing real-time pins of all checked-in promoters across South Africa.

B. Payroll & Reporting

- **Module 4: Payroll Approval:** A list of completed shifts.
    - Column for "Calculated Pay" vs. "Manual Adjustment."
    - "Approve All" button for bulk Paystack/CSV export.

4. Navigation Framework (Common Elements)

User Role	Navigation Menu (Tabs)
Promoter	Home (Jobs) | My Shifts | Earnings | Profile
Supervisor	Active Venues | Team Monitor | Issue Log | Profile
Admin	Dashboard | Promoters | Jobs | Payroll | Reports | Settings

UI/UX Design Standards (For Developers)

- **Feedback Loops:** Use a "Success" toast notification when a document is uploaded.
- **Geo-Fencing:** If the "Start Shift" button is clicked outside the radius, show a "How far away" indicator (e.g., "You are 450m away").
- **Offline State:** Cache the "Today's Job" details so if data drops at a venue, the promoter can still see the supervisor's contact info.
